

NEWS FOR RELEASE: Friday May 5, 2023 10:00 am Eastern Time

**Instant Connect, Cubic, and Rally Tactical Systems partnership  
presents ground-breaking tactical radio interoperability  
for the U.S. Military and its global allies**

*Enhancing warfighter communications with next-generation  
language translation capability*

Chicago, Illinois, USA – May 5, 2023

[Instant Connect Software](#), [Cubic DTECH Mission Solutions](#), and [Rally Tactical Systems](#) are proud to announce a joint offering in [tactical radio interoperability](#) that is poised to support and enhance seamless coalition force communications for the U.S. military and its global allies.

Instant Connect's interoperable Push-to-Talk (PTT) platform, a proven IP-based push-to-talk solution powered by Rally Tactical Systems' Engage Engine, is integrated with Cubic's RoIP radio gateways, including the Vocality, M3X and M3-SE brands. Supporting missions from the command post through the dismounted soldier or first responder, this best-in-class military-grade hardware and software offering helps users achieve tactical missions with greater communications flexibility, situational awareness, and multilingual collaboration.

The next-generation radio/IP interoperability feature includes a versatile "any language to any language" translation capability that lets warfighters and coalition partners instantly communicate with each other, regardless of language, and keep multilingual missions on track.

Forrest Claypool, Instant Connect's CEO, said the companies share a commitment to allied forces worldwide. "The Instant Connect PTT platform, integrated with Cubic RoIP gateways through the Engage Engine, offers coalition forces a range of best-in-class features that includes automatic language translation, super-lightweight serverless deployment, Android Tactical Assault Kit (ATAK) and Windows Team Awareness Kit (WinTAK) plug-ins, and superior interoperability across Mobile Ad Hoc Network (MANET) and other radio environments," Claypool said. "The caliber of our joint offering is irrefutable. For example, our PTT software solution is Joint Interoperability Test Command (JITC)-certified and included on the DoD Information Network (DoDIN)-approved product list, joining a select cadre of software products."

"Cubic is proud to support the U.S. military and its allies," said Anthony Verna, senior vice president of CMPS DTECH Mission Solutions business. "Our collaboration with Instant Connect Software and Rally Tactical Systems further enhances and extends our Mission Forward focus

---

and provides warfighters with the Radio over Internet Protocol (RoIP) environments they need to accomplish the mission. The integration opens a world of opportunity to provide even greater radio and IP interoperability, performance, and encryption, along with multiple-force, multilingual collaboration.”

See a demonstration of the Instant Connect, Cubic, and Rally Tactical Systems collaboration during the Special Operations Forces (SOF) Week, May 9–11 at the Tampa, Florida, Convention Center.

### **About Instant Connect**

Instant Connect Software LLC is a global leader in tactical voice communications for militaries, government, life safety, and commercial enterprises. The company provides warfighters, government, life safety, and commercial frontline teams with interoperable next-gen voice communications that connect mobile, IP, radio, and telephony devices across MANETs, private and public Long-Term Evolution (LTE), 5G, Wi-Fi, radio, and other networks. The company is currently engaged with military and government agencies around the world, including every branch of the U.S. military and many NATO allies. These engagements range from frontline military units to covert operations to strategic command and base operations. Instant Connect is an affiliated business of the Chicago-based Dillon Kane Group (DKG). Visit <https://www.instantconnectnow.com/>.
